EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears bellow. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as proved by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
2. Authorization for this Examiner's Amendment was given in a telephone interview with Ms. Victoria Donnelly (Reg. No. 44,185) on September 13, 2005.

In the Claims:

i) Please amend claim 6 as following:

A method of automatically allocating a unique address to a network device, comprising the steps of:

introducing a set of identifiers associated with the network device, each identifier designating an assignment of the network device to a hierarchical layer of devices in the network and being unique to the layer;

applying a first transformation, which has the inverse transformation, to the set of identifiers, the value of the transformation being the address of the network device,

[-]the method further comprising the step of arranging the addresses of the devices in the network in a predetermined order, comprising:

communicating the device addresses assigned ~~in the method of claim 1~~ between the devices that are directly connected to each other by one of the physical and logical link;

for each device, applying an ordering condition to the address received existing address of the device and the from the connected device; and

if the condition is satisfied, apply a second transformation having the inverse transformation, to one of the existing and received device addresses to change one of the existing and received addresses so that the network device addresses are unique and arranged in the order defined by the second transformation.

ii) Replace claims 25-30 as shown on the attached paper.

Reasons for allowance

3. The following is an examiner's statement of reasons for allowance:

Applicant's claimed invention distinguished over the prior art for the following reasons. The claims are allowable over the prior art of record because none of the references, either alone or in combination, discloses or renders obvious the method for automatically allocating a unique address to a network device, comprising the steps of introducing a set of identifiers associated with the network device, each identifier designating an assignment of the network device to a hierarchical layer of devices in the network and being unique to the layer; applying a first transformation, which has the inverse transformation, to the set of identifiers, the value of the transformation being the

address of the network device; applying an ordering condition to the address received existing address of the device and the from the connected device; and if the condition is satisfied, apply a second transformation having the inverse transformation, to one of the existing and received device addresses to change one of the existing and received addresses so that the network device addresses are unique and arranged in the order defined by the second transformation

Conclusion

4. Any comments considering necessary by applicant must be submitted no later than the payment of issue fee and, to avoid processing delays, should preferably accompany the issue fee.
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jinsong Hu whose telephone number is (571) 272-3965. The examiner can normally be reached on 8:00 AM - 5:30 PM.
